

TRAVEL

Software solutions that deliver positive results

Automobiles and recreational vehicles are a top choice for a wide cross section of users: whether it is a business user looking for an affordable means of commute, or a vacationer who is looking for a home that he can take with him!

Automotive rental businesses have a very niche set of business needs, and business applications meeting those needs are few and far between.

Sample this:

- Robust online reservations
- Integration of travel agents' booking systems
- Order management
- Fleet and driver tracking/utilization monitoring
- Customer identity verification
- Differentiated billing arrangements

What do you need to manage all these effectively?

A robust, scalable and cost effective technology solution.

A solution that Vishwak can build for you.

Who are we?

Vishwak is headquartered in Seattle, WA, with global delivery centers in Chennai, India and Los Angeles, CA. Vishwak's founding objective was to help our customers in the insurance vertical build custom solutions for their businesses quickly, using Microsoft technologies and mobility. We bring a track record of two decades in software solution development to deliver what our customers need:

Business applications that work. Business applications that make IT management easier.

What we do?

Our travel business unit specializes in leveraging technology to:

- Develop custom automotive rental applications that fit closely to your operations
- Enable seamless online reservations for your customers, offering differentiated tariffs, loyalty points and other benefits
- Ensuring the upkeep and maintenance of your most priced asset: your fleet
- e-Discovery
- Rights management
- Legal hold
- Policy control
- Data loss prevention
- Mobile device management (MDM)

How we do?

We bring together expertise in multiple technology areas:

- Microsoft Technologies
- Amazon Web Services
- Mobile application development (iOS, Android, Windows)
- Open Source Technologies: Hadoop, MongoDB
- Responsive web and HTML 5.0

Why choose Vishwak?

Vishwak is a Microsoft Gold Certified Partner on:

- Devices and Deployment
- Mobility
- Collaboration and Content
- Application Development

Our businesses are driven by:

Solution design philosophy: Solutions that are scalable; solutions that are cost effective!

Vertical expertise: We understand your business and technology to solve your problems.

Bridging cultural distances: We are multicultural, understand client specific issues and communication challenges, to ensure a win-win long term association.
